

Reinventing Companies Since **1982**

Business Creation is here to build on the good from the past and create the best for the future! We focus on building people powered business that create & sustain jobs through focus on customer needs, social & environmental innovation with support of regional stakeholders. Our primary industries we operate in are MedTech, DigiTech and FinTech. Business Creation has a rich history in reinventing industrial companies who are on the brink of failure or just can't seem to take off. Our heritage proves our value, we have worked with some of the biggest industry names and are always looking for new opportunities to help business to flourish and retain and create jobs. If you are considering closing down a product line or business unit, Business Creation can help to preserve jobs, and revitalize the business towards a healthy and sustainable future.

Our Philosophy.

Our philosophy is that all companies are as good as how they work with their clients, (social)partners, suppliers and how they treat staff. People are at the heart of each business. We aim to create and preserve jobs and create companies where people enjoy working, entrepreneurial spirit is present, change is the standard, inclusiveness and holistic thinking is valued.

Are you ready
for the
21st century?

Established in 1982, Business Creation has over 35 years of experience in restructuring and redevelopment in a broad range of industry sectors but today we focus on MedTech, FinTech and DigiTech. Over the years we have achieved:

120

Complex
divestments
and
restructuring
projects

50%

Savings on
closure and
restructuring

120

Thousand
jobs
safeguarded
and created

53%

IRR/year
realised for
investors

6

Million square
meters of
real estate
developed

Private equity, but different

Our clients are not just the businesses we work with, but also the employees, clients and (social)partners of these companies. We help companies to reduce the cost of restructuring, cold closure and avoid unnecessary loss of jobs.

We are mostly interested in business units/companies with between 10-200 employees and a revenue line of between 500 Thousand and 25 Million Euro located in Europe, where business has been flat or declining.

The parties we have worked with in the past are, amongst others, Sony, MedTronic, Philips, ABB, Fresenius. We are also interested to work with SME companies that struggle to grow, expand or are just not realising their potential for various reasons. Companies we have worked with are BizzDesign and BEAMWallet.
